## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-32, drawn to an imaging apparatus in which first and second images are co-registered using a computerized system and the second image is used to obtain a set of attenuation instructions which are then applied to the first image using said computerized system.

Group II, claim(s) 33-45, drawn to a probe and imaging method wherein nuclear radiation is performed and detected and ultrasound is performed and detected, co-registering occurs, but not by a computerized system, and no attenuation instructions are generated.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature present in claims 1-32, namely a computerized system for co-registering first and second images and computing attenuation instructions for the first image based on the second image.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
